

**OHHN - Collaborative Policy Scan Project
Summary Report**

for Community Partnerships in South-West Region

Provision Notes:

The **Ontario Heart Health Network** (OHHN) is the provincial network that supports the OHHP-Taking Action for Healthy Living Community Partnerships across six regions in Ontario.

The OHHN Policy Work Group conducted a scan of policies *across the 36 OHHP-Taking Action for Healthy Living Community Partnerships in five areas*: 1) access to nutritious foods; 2) access to recreation and physical activity; 3) active transportation and the built environment; 4) prevention of alcohol misuse and 5) prevention of tobacco use and exposure *across three sectors* a) *Education*: school boards; b) *Health Care*: hospitals as a worksite (e.g. what policies exist on these topics for health care staff) and c) *Government* (district/region; county; municipality; township).

Purpose

The purpose of this scan was to *create a baseline inventory of policies that exist* at the provincial level based on local data to inform the transition of OHHP-Taking Action for Healthy Living Community Partnerships to Healthy Community Partnerships under the Ministry of Health Promotion's new Healthy Communities Ontario approach to be implemented in 2010.

www.mhp.gov.on.ca/english/default.asp

Policy is defined as:

- a principle, value or course of action that guides present and future decision-making;
- can be implemented in a variety of settings, such as schools, worksites and community;
- can be formal or informal, but it should specify expectations, regulations and guides to action;
- can provide more equitable access to determinants of health such as income, housing, and education: and
- can have a consequence for non-compliance and some method of enforcement

Ontario Heart Health Network. (2007) Volume 1: Building Healthy Policy across Ontario through Community Partnerships. www.ohhn.net

About this Scan and the Information Found:

The policy questions developed for this scan were informed by evidence-based reports and publications.

There is recognition that not all policies would be applicable for all areas in Ontario.

A protocol book was written and utilized by the consultants contracted to complete this policy scan.

The data collected for this scan was between October 26, 2009 and December 13, 2009. Data was collected by scanning publicly available websites and/or contacting representatives via telephone or email. The source of information is identified for each question.

Where policies exist (e.g. "yes" has been chosen for level of government, school board and hospital), there will be a list of the number of policies that exist and where they are located.

For example the:

- **Provincial Summary** lists the number of policies that exist within the six OHHN Region;
- **Six OHHN Regional Summaries** lists the number of policies that exist within each of the OHHP-TAFHL Community Partnerships within that region;
- **36 OHHP-TAFHL Community Partnerships** lists the number of policies that exist by identifying the level of government, school board and hospital name.

****The exception to the rule is Level of Government: Question # 3.2 (Official Plan); listed is the number of policies that DO NOT EXIST.**

Notes written by the consultant are not included in this summary report. Please refer to the individual reports to review notes written.

More information about this policy scan is available at www.ohhn.net

Local Government Summary

Section 1: Access to Nutritious Food

1.1 Policies that restrict advertising of food products to children (e.g. transit ads, no ads for specific foods in recreation centres)

Existence of a Policy

87 No
